FULL STACK DEVELOPER

Proficient in full stack development, with hands-on experience in building responsive, user-friendly and efficient websites, performing testing, debugging, problem-solving and project management. Adept at collaborating with cross-functional teams and delivering high-quality solutions. I am seeking a lucrative job to enhance my abilities as well as the goals of the company.

TECHNICAL SKILLS

Languages	: JavaScript , C-Sharp(C#)
Frontend	: HTML5, CSS3, Tailwind CSS, Bootstrap, JavaScript, React.js
Backend	: Node.js, Express, ASP.NET CORE MVC, .NET WEB API, ADO.NET & ENTITY FRAME WORK
Databases	: MS SQL, PostgreSQL, MongoDB
Other Tools	: Visual Studio Code, Microsoft Visual Studio, Git, GitHub, vercel, render
Basic Knowledge	: Python, Java, DSA
Others	: Leetcode 47 questions solved.

EDUCATION

University of Kerala
Bachelor of Technology in Mechanical Engineering

Kerala, India
Apr 2013 – Apr 2017

PROJECTS

[HRMS PRO \(HR Management Website Link\)](#) *React.js, Tailwind CSS, Node js, Express js, MongoDB, Git* [Source Code](#)

- **MongoDB & Mongoose:** Schema design with real-world validation, Compound indexes for performance, Document relationships using ObjectId + ref, Embedded sub-documents, Collision-safe custom ID generation (EMP-XXXX), Database connection with retry logic, Database seeding.
- **Express.JS:** MVC Architecture, REST API design, Custom middleware, Dynamic CORS, asyncHandler for clean async/await, Nodemailer for HTML email notifications, ES modules.
- **React.JS:** Context API for global state, Custom hooks (useApi, useDebounce), Advanced Axios interceptors with a failedQueue for silent token refreshing, React Router v7 with protected routes, Recharts for dashboard analytics.
- **Security:** bcrypt Password hashing, JWT+Refresh Token strategy, RBAC, Token Error Handling, Multi-layered Rate Limiting, Security headers (Helmet), HTTP Parameter Pollution (HPP) protection.
- **Infrastructure & Real-Time:** Socket.IO integration (Server & Client) for personal user rooms and real-time push notifications, Multer with memoryStorage piped to Cloudinary streams for file uploads, deployment in vercel & render.

[QuickPark \(Parking Management Website Link\)](#) *React, ASP.NET CORE MVC, WEB API, Entity, Postgre-SQL, Git* [Source Code](#)

- **System Design & Pattern:** RESTful API Design, Dependency Injection (DI), Repository / Service Layer Pattern, DTO Pattern (Data Transfer Objects), Mapping Helper, Global Exception Handling, Health Check Endpoint, Payment Gateway Simulation, deployment related experience in render and vercel.
- **DataBase:** Entity Framework Core (EF Core), Code-First Migrations, Database Seeding, Composite Indexes, PostgreSQL, Npgsql, LINQ & EF Queries.
- **Security:** bcrypt Password Hashing, JWT, Role-Based Authorization, CORS Policy, Security Headers, Claims-based Identity.
- **React.JS:** Context API with Provider pattern split into files, Custom hooks, Service Layer, React Router v7, Framer Motion for animated page transitions, Google Maps integration.

[Forever \(E-commerce Website Link\)](#) *React.js, Tailwind CSS, Node js, Express js, MongoDB, Git* [Source Code](#)

- Designed and developed a clean and modern website using **Tailwind CSS and React.JS**
- Utilized **responsive design** to ensure compatibility across all devices
 - Axios to connect with backend
- A **CRUD application** exposed using a RESTful API made with Node.js
 - Role-Based Access Control

- Middleware and Error Handling • Authentication and Authorization • JWT Authentication
- Exposed POST, GET, PUT and DELETE HTTP methods using **Express** • API integration
- MongoDB Database, Schema Design and Database integration • File Handling & Upload
- Payment Gate Way integration • Projects Deployment in GitHub, Vercel and Render.

EXPERIENCE IN

- **Planning**
 - System Design and Architecture • Proper folder structure with respect to business logic
- **Frontend**
 - Design of UI/UX interfaces-Figma prototype • Lazy loading • API Fetch • Event listeners, call back, promise, class • MVC Architectural Pattern. • React- components, props, Hooks • ES6 features: Import and export, NPM, Nodemon
- **Backend**
 - Monolithic Architecture • Routing • Making APIs and set endpoints • Handling JSON data • OOPS concept • User & admin register, sign in/sign out, Authentication, hashing, Authentication Tokens (JWTs), Sensitive Data Tokenization and encryption. • Custom middleware • Database integration • Admin Product updating, CURD operation • Add to cart and Payment gateway
- **Database**
 - Database management,Schema design with real-world validation, Compound indexes for performance CURD operation.
